PROFILE

Grade 10 American diploma student with a strong passion for technology and engineering. Hands-on experience in web development, game development, and robotics. I build real products for students, schools, startups and brands — and I edit video, design graphics and create content to turn ideas into polished visual work. Currently preparing for the SAT/ACT while shipping web projects and moving toward AI engineering.

SKILLS

HTML

CSS

JavaScript

C++

C#

Unity 2D/3D

Robotics

Hardware

Cybersecurity basics

Video Editing

Graphic Design

Content Creation

AI (learning)

LIVE PROJECTS

Mousa SAT — mousasat.com

SAT learning platform: courses, mock exams, student dashboard, AI features.

RealSatPrep — realsatprep.com

Digital SAT prep: practice, question bank, mock exams and analytics.

Sideredu — sideredu.com

Educational platform helping students take their next step in learning.

MOO Teams — mooteams.com

Creative studio and brand website for MOO Studio.

PROJECTS IN PROGRESS

STEM Educational Platform

A STEMer Zone platform built as a bigger alternative to existing STEM learning sites.

VisionTrack

AI & computer vision project to help locate missing persons — currently a demo.

Eagle Eye

ITC 2026 Egypt Edition — smart detection & tracking system with precision targeting vision.

DroneRoute AI

ITC 2026 Egypt Edition — AI-powered drone routing and navigation for aerial missions.

MedAtlas

Medical mapping platform — find medicines and pharmacies nearby with smart routing.

Step Education

Step by step to your future — educational platform empowering students.

EXPERIENCE & ACTIVITIES

ITC 2026 — Egypt Edition

Competed with Eagle Eye and DroneRoute AI, building AI-driven detection and drone navigation systems.

ORCE — Pharos University, Alexandria

Robotics competitor: designed, built and programmed competition robots in C++.

Freelance Web Developer

Delivered live platforms for SAT prep, education and creative brands.

Video Editor & Graphic Designer

Editing and design work for creators, teams and brands.

Hardware & Cybersecurity

PC maintenance and customization; applying security fundamentals to projects.

Let's build something impactful together.
